Description of the four Quarters of the Year; and first of Winter.

Sol in *Capricorn*, *Aquarius*, *Pisces*.

According to the custom of Writers in this kind, Winter-quarter is the first quarter, which took beginning the 11 day of December, which time the Sun enter'd into the first degree of the cold and dry Capricorn, being the most remote from us, in his farthest South station, causing the days with us to be shortest, and the nights long. This quarter continues until the Sun hath slowly passed through Capricorn, Aquarius, and Pisces; and doth naturally resemble Old Age.

Of the Spring. *Sol* in *Aries*, *Taurus*, *Gemini*.

This quarter doth take beginning the 9th of March, at which time the Sun entreth into the first minute of Aries, making equal day and night, and continues whilst the Sun is passing through Aries, Taurus and Gemini. This quarter doth resemble Growing Youth.

Of Summer. *Sol* in *Cancer*, *Leo*, *Virgo*.

The Summer-quarter doth take his beginning when the Sun enters into the first degree of Cancer, which will be this year on the 11 of June, and continues whilst the Sun passeth through Cancer, Leo, Virgo. In the days are longest, and the air hottest; therefore but for necessary Physick adieu.

Of Autumn. *Sol* in *Libra*, *Scorpio*, *Sagitarius*.

Autumn, or Harvest-quarter (commonly called the Fall of the Leaf, by some the latter Spring) begins when the Sun enters into the first degree of Libra, again making the day and night of equal length; which is this year the 12 of September, and continues whilst the Sun passeth through Libra, Scorpio, and Sagitarius. This quarter doth fitly resemble Declining Age, and Phlegmatick Complexion.
